

Load links | Available with SmartLoad® technology

V1.0

Scotload's cost effective load links enable accurate and reliable load monitoring.

Our links are designed to minimise stress concentrations and maximise strength. The design incorporates features which maximise reliability, minimise the risk of damage and ensures ease of use.

Manufactured from high tensile, aerospace grade anodised aluminium, our load links are suitable for use across all industry sectors including marine and offshore. They are fully Finite Element Analysis (FEA) optimised and destructively tested.

We have a range of links in stock, up to 500 tonnes for purchase or hire, and ready for immediate dispatch. Larger capacities are available on request and all of our load links are supplied with full calibration and proof load certificates.
